Subject Index of Volume 55

Acetaldehyde
  dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides: example of gas–liquid chromatographic catalytic system and comparison with behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
Acetylene
  interaction of, with Si and Ge(100) surfaces; theoretical study, 101
Activation
  peculiarities of CO, on ultra-dispersed Co catalysts obtained via thermal decomposition of surface carbonyl Co complexes, 146
Active site
  model of selective energy transfer at, of catalyst, 70
Alcohol
  catalysis of Cu^{II}– and Co^{II}–polyvinylpyridine complexes in oxidation of 3,5-di-t-butylcatechol, 379
  catalytic dehydration of aliphatic alcohol under homogeneous and heterogeneous conditions, 285
  dehydration mechanism of ethanol in pseudoliquid phase of $H_{3-x}Cs_x\text{-}PW_{12}O_{40}$, 293
  dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides: example of gas–liquid chromatographic catalytic system and comparison with behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
  formation of 2,6-dimethylaniline from 2,6-dimethylphenol with catalysts obtained via anchoring colloidal Pd compounds on carbon supports, 415
  surface properties of ZnO-based catalysts and related mechanistic features of higher alcohol synthesis by FT–IR spectroscopy and TPSR, 43
  synthesis from syngas over Co catalysts prepared from $Co_2(CO)_8$, 361
Alkanes
  IR and UV–vis spectroscopic studies of stable $Mo{=}CH_2$ carbene complexes over photoreduced silica–molybdena catalysts with chemisorbed cyclopropane, and their role in olefin metathesis reactions, 126
  oxidation of cyclohexane with H_2O_2 and chlorotetratolylporphyrinatochromium(III) as catalyst, 268
  surface reactions of alkanes and organometallic chemistry applied to study of pure and bimetallic catalysts, 34
Alkenes, olefins
  butadiene oligomerization and telomerization catalyzed by transition metal complexes supported on organic polymers, 340
  comparative analysis of homogeneous and immobilized catalysts for ethylene dimerization based on Ni(II) chelates, 302
  dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides: example of gas–liquid chromatographic catalytic system and comparison with behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
  Groups 8 and 9 metal carbonyls as catalysts for 1,5-cyclooctadiene isomerization, 229
  heterogenized P(V)–Mo(VI) mixed oxo derivatives as bimetallic catalysts for cyclohexene liquid-phase epoxidation, 371
  IR spectroscopic studies of ethylene hydroformylation on Rh/SiO_2: investigation of relationships between homogeneous and heterogeneous hydroformylation, 12

© Elsevier Sequoia/Printed in The Netherlands

IR and UV–vis spectroscopic studies of stable Mo=CH_2 carbene complexes over photoreduced silica–molybdena catalysts with chemisorbed cyclopropane, and their role in olefin metathesis reactions, 126
kinetics and mechanism of gas-phase oxidation of 1-butene to butanone over new heterogenized surface vanadate Wacker catalyst, 320
mechanism of selective oxidation of C_4 linear hydrocarbons to maleic anhydride: FT–IR study of adsorption and oxidation of 1,3-butadiene on vanadia–titania, 1
spectroscopic evidence for surface Nb carbene in new SiO_2-attached Nb catalyst active for propene metathesis, 159

Alkylation
N-; homogeneous Ru catalysis of, of amides and lactams, 241

Amides
and lactams; homogeneous Ru catalysis of *N*-alkylation of, 241
preparation and catalytic activity of Rh and Pt complexes attached to polyamides having pyridine moiety, 256

Amine
role of resin–amine transition metal complexes in H_2O_2 decomposition, 396

Aromatic compounds
catalysis of Cu^{II}– and Co^{II}–polyvinylpyridine complexes in oxidation of 3,5-di-t-butylcatechol, 379
composition and catalytic properties of Pd(II) complexes with poly(vinylpyridine), 406
formation of 2,6-dimethylaniline from 2,6-dimethylphenol with catalysts obtained via anchoring colloidal Pd compounds on carbon supports, 415
oxidative reactivity of $(NEt_4)[Mo^{V}O(SR)_4]$ complexes: catalytic oxidation of benzoin by proton and electron transfer, 276
preparation and catalytic activity of Rh and Pt complexes attached to polyamides having pyridine moiety, 256

Butanone
kinetics and mechanism of gas-phase oxidation of 1-butene to, over new heterogenized surface vanadate Wacker catalyst, 320

Caesium
dehydration mechanism of ethanol in pseudoliquid phase of $H_{3-x}Cs_x$-$PW_{12}O_{40}$, 293

Carbene
IR and UV–vis spectroscopic studies of stable Mo=CH_2 carbene complexes over photoreduced silica–molybdena catalysts with chemisorbed cyclopropane, and their role in olefin metathesis reactions, 126
spectroscopic evidence for surface Nb carbene in new SiO_2-attached Nb catalyst active for propene metathesis, 159

Carbon monoxide activation
peculiarities of, on ultra-dispersed Co catalysts obtained via thermal decomposition of surface carbonyl Co complexes, 146

Carbon supports
formation of 2,6-dimethylaniline from 2,6-dimethylphenol with catalysts obtained via anchoring colloidal Pd compounds on, 415
supported metallic catalysts obtained by anchoring metal complexes on, 109

Chelates
comparative analysis of homogeneous and immobilized catalysts for ethylene dimerization based on Ni(II) chelates, 302
heterogenization of homogeneous catalysts by chelate formation with macroligands, 429
hydrogenation of unsaturated and nitro compounds on polymer-supported Pd(0) chelates, 391

Chromium
nature of surface Cr species on CrO_x/ZrO_3 catalysts, 23
oxidation of cyclohexane with H_2O_2 and chlorotetratolylporphyrinatochromium(III) as catalyst, 268
selective hydrogenation of heavy polyunsaturated molecules on Cu–Cr catalysts, 170

Cobalt
alcohol synthesis from syngas over Co catalysts prepared from $Co_2(CO)_8$, 361

catalysis of Cu^{II}– and Co^{II}–polyvinylpyridine complexes in oxidation of 3,5-di-t-butylcatechol, 379
peculiarities of CO activation on ultradispersed Co catalysts obtained via thermal decomposition of surface carbonyl Co complexes, 146
Copper
catalysis of Cu^{II}– and Co^{II}–polyvinylpyridine complexes in oxidation of 3,5-di-t-butylcatechol, 379
catalytic behaviour of $[Cu(en_2)]^{2+}$ sorbed on zirconium molybdate in decomposition of H_2O_2, 199
dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides: example of gas–liquid chromatographic catalytic system and comparison with behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
selective hydrogenation of heavy polyunsaturated molecules on Cu–Cr catalysts, 170

Decomposition
of H_2O_2; catalytic behaviour of $[Cu(en_2)]^{2+}$ sorbed on zirconium molybdate in, 199
H_2O_2; role of resin–amine transition metal complexes in, 396
thermal; peculiarities of CO activation on ultra-dispersed Co catalysts obtained via, of surface carbonyl Co complexes, 146
Dehydration
catalytic, of aliphatic alcohol under homogeneous and heterogeneous conditions, 285
mechanism of ethanol in pseudoliquid phase of $H_{3-x}Cs_xPW_{12}O_{40}$, 293
Dehydrogenation
of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides: example of gas–liquid chromatographic catalytic system and comparison with behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
Dimerization
catalytic, of methyl acrylate; synthesis of potential hybrid catalysts upon coordination of 'bare' Pd(II) with crosslinked macromolecular nitriles, 209
ethylene; comparative analysis of homogeneous and immobilized catalysts for, based on Ni(II) chelates, 302

Energy transfer
selective, at active site of catalyst; model, 70
Epoxidation
cyclohexene liquid-phase; heterogenized P(V)–Mo(VI) mixed oxo derivatives as bimetallic catalysts for, 371

Germanium
interaction of acetylene with Si and Ge(100) surfaces; theoretical study, 101
Group 8 and 9 metal carbonyls
as catalysts for 1,5-cyclooctadiene isomerization, 229

Holmium
and Pr ions; effect of, on Pd/SiO_2 properties using catalysts prepared via supported organometallic complexes, 84
Hybrid catalysts
potential; synthesis of, upon coordination of 'bare' Pd(II) with crosslinked macromolecular nitriles: catalytic dimerization of methyl acrylate, 209
Hydration
dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides: example of gas–liquid chromatographic catalytic system and comparison with behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
Hydrocarbonylation reactions
catalytic: role of homogeneous and heterogeneous protonic and Lewis acids in; cooperative effects of H^+ and H^-hydridocarbonyl Ru derivatives, 184
Hydroformylation
ethylene: IR spectroscopic studies of, on Rh/SiO_2; investigation of

relationships between homogeneous and heterogeneous hydroformylation, 12
Hydrogenation
Pd, catalysts supported on ion-exchange resins, 247
selective, of heavy polyunsaturated molecules on Cu–Cr catalysts, 170
of unsaturated and nitro compounds on polymer-supported Pd(0) chelates, 391
Hydrogen peroxide
catalytic behaviour of $[Cu(en_2)]^{2+}$ sorbed on zirconium molybdate in decomposition of, 199
decomposition; role of resin–amine transition metal complexes in, 396
oxidation of cyclohexane with, and chlorotetratolylporphyrinatochromium(III) as catalyst, 268

Immobilization
comparative analysis of homogeneous and immobilized catalysts for ethylene dimerization based on Ni(II) chelates, 302
Iron stearate
-based organometallic catalysts supported on iron and nickel hydroxides, 94
Isomerization
1,5-cyclooctadiene; Group 8 and 9 metal carbonyls as catalysts for, 299

Lactams
and amides; homogeneous Ru catalysis of *N*-alkylation of, 241
Lewis acids
cooperative effects of H^+ and H^- hydridocarbonyl Ru derivatives: role of homogeneous and heterogeneous protonic and Lewis acids in catalytic hydrocarbonylation reactions, 184
Lithium
catalytic behaviour of interlayer-supported Pd(II) complexes on Li hectorite, 353

Macroligands
heterogenization of homogeneous catalysts by chelate formation with, 429
Maleic anhydride
mechanism of selective oxidation of C_4 linear hydrocarbons to: FT–IR study of adsorption and oxidation of 1,3-butadiene on vanadia–titania, 1
Metathesis
olefin, reactions; IR and UV–vis spectroscopic studies of stable $Mo{=}CH_2$ carbene complexes over photoreduced silica–molybdena catalysts with chemisorbed cyclopropane, and their role in, 126
propene; spectroscopic evidence for surface Nb carbene in new SiO_2-attached Nb catalyst active for, 159
Methyl acrylate
synthesis of potential hybrid catalysts upon coordination of 'bare' Pd(II) with crosslinked macromolecular nitriles: catalytic dimerization of, 209
Molybdenum
catalytic behaviour of $[Cu(en_2)]^{2+}$ sorbed on zirconium molybdate in decomposition of H_2O_2, 199
heterogenized P(V)–Mo(VI) mixed oxo derivatives as bimetallic catalysts for cyclohexene liquid-phase epoxidation, 371
IR and UV–vis spectroscopic studies of stable $Mo{=}CH_2$ carbene complexes over photoreduced silica–molybdena catalysts with chemisorbed cyclopropane, and their role in oelfin metathesis reactions, 126
oxidative reactivity of $(NEt_4)[Mo^{V}O(SR)_4]$ complexes: catalytic oxidation of benzoin by proton and electron transfer, 276

Nickel
comparative analysis of homogeneous and immobilized catalysts for ethylene dimerization based on Ni(II) chelates, 302
dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides: example of gas–liquid chromatographic catalytic system and comrison with behaviour of supported

$(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
iron stearate-based organometallic catalysts supported on iron and nickel hydroxides, 94
Niobium
spectroscopic evidence for surface Nb carbene in new SiO_2-attached Nb catalyst active for propene metathesis, 159

Olefins: see Alkenes
Oligomerization
butadiene, and telomerization catalyzed by transition metal complexes supported on organic polymers, 340
Organometallic catalysts
iron stearate-based, supported on iron and nickel hydroxides, 94
Organometallic chemistry
applied to study of pure and bimetallic catalysts, and surface reactions of alkanes, 34
Organometallic complexes
supported; effect of Pr and Ho ions on Pd/SiO_2 properties using catalysts prepared via, 84
Osmium
dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides: example of gas–liquid chromatographic catalytic system and comparison with behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
Oxidation
catalysis of Cu^{II}– and Co^{II}–polyvinylpyridine complexes in, of 3,5-di-t-butylcatechol, 379
catalytic, of benzoin by proton and electron transfer; oxidative reactivity of $(NEt_4)[Mo^{V}O(SR)_4]$ complexes, 276
of cyclohexane with H_2O_2 and chlorotetratolylporphyrinatochromium-(III) as catalyst, 268
gas-phase, of 1-butene to butanone over new heterogenized surface vanadate Wacker catalyst; kinetics and mechanism, 320
mechanism of selective oxidation of C_4 linear hydrocarbons to maleic anhydride: FT–IR study of adsorption and oxidation of 1,3-butadiene on vanadia–titania, 1

Palladium
catalytic behaviour of interlayer-supported Pd(II) complexes on Li hectorite, 353
composition and catalytic properties of Pd(II) complexes with poly-(vinylpyridine), 406
effect of Pr and Ho ions on Pd/SiO_2 properties using catalysts prepared via supported organometallic complexes, 84
formation of 2,6-dimethylaniline from 2,6-dimethylphenol with catalysts obtained via anchoring colloidal Pd compounds on carbon supports, 415
heterogenized metal complex catalysts based on Pd black, 220
hydrogenation of unsaturated and nitro compounds on polymer-supported Pd(0) chelates, 391
Pd hydrogenation catalysts supported on ion-exchange resins, 247
synthesis of potential hybrid catalysts upon coordination of 'bare' Pd(II) with crosslinked macromolecular nitriles: catalytic dimerization of methyl acrylate, 209
Phosphorus
heterogenized P(V)–Mo(VI) mixed oxo derivatives as bimetallic catalysts for cyclohexene liquid-phase epoxidation, 371
Platinum
preparation and catalytic activity of Rh and Pt complexes attached to polyamides having pyridine moiety, 256
Polymers
hydrogenation of unsaturated and nitro compounds on polymer-supported Pd(0) chelates, 391
organic; butadiene oligomerization and telomerization catalyzed by transition metal complexes supported on, 340
Potassium
dehydrogenation of ethanol and hydration of ethylene to acetaldehyde on molten KCl–CuCl eutectic supported on inorganic oxides:

example of gas–liquid chromatographic catalytic system and comparison with behaviour of supported $(\eta^5\text{-}C_5H_5)NiOs_3(\mu\text{-}H)_2(\mu\text{-}CuPPh_3)(CO)_9$, 311
Praseodymium
and Ho ions: effect of, on Pd/SiO_2 properties using catalysts prepared via supported organometallic complexes, 84

Resins
ion-exchange; Pd hydrogenation catalysts supported on, 247
role of resin–amine transition metal complexes in H_2O_2 decomposition, 396
Rhodium
IR spectroscopic studies of ethylene hydroformylation on Rh/SiO_2: investigation of relationships between homogeneous and heterogeneous hydroformylation, 12
metal complexes in inorganic matrices: catalytic activity of $Rh(CO)Cl(PR_3)_4$ heterogenized by sol–gel method, 330
preparation and catalytic activity of Rh and Pt complexes attached to polyamides having pyridine moiety, 256
support and additive effects on state of Rh catalysts, 55
Ruthenium
cooperative effects of H^+ and H^- hydridocarbonyl Ru derivatives: role of homogeneous and heterogeneous protonic and Lewis acids in catalytic hydrocarbonylation reactions, 184
homogeneous Ru catalysis of *N*-alkylation of amides and lactams, 241

Silicon
effect of Pr and Ho ions on Pd/SiO_2 properties using catalysts prepared via supported organometallic complexes, 84
and Ge(100) surfaces: interaction of acetylene with; theoretical study, 101
IR spectroscopic studies of ethylene hydroformylation on Rh/SiO_2; investigation of relationships between homogeneous and heterogeneous hydroformylation, 12
IR and UV–vis spectroscopic studies of stable $Mo{=}CH_2$ carbene complexes over photoreduced silica–molybdena catalysts with chemisorbed cyclopropane, and their role in olefin metathesis reactions, 126
spectroscopic evidence for surface Nb carbene in new SiO_2-attached Nb catalyst active for propene metathesis, 159
Sol–gel method
catalytic activity of $Rh(CO)Cl(PR_3)_2$ heterogenized by; metal complexes in inorganic matrices, 330
Spectroscopy
IR spectroscopic studies of ethylene hydroformylation on Rh/SiO_2: investigation of relationships between homogeneous and heterogeneous hydroformylation, 12
IR and UV–vis spectroscopic studies of stable $Mo{=}CH_2$ carbene complexes over photoreduced silica–molybdena catalysts with chemisorbed cyclopropane, and their role in olefin metathesis reactions, 126
mechanism of selective oxidation of C_4 linear hydrocarbons to maleic anhydride: FT–IR study of adsorption and oxidation of 1,3-butadiene on vanadia–titania, 1
spectroscopic evidence for surface Nb carbene in new SiO_2-attached Nb catalyst active for propene metathesis, 159
surface properties of ZnO-based catalysts and related mechanistic features of higher alcohol synthesis by FT–IR spectroscopy and TPSR, 43
Surfaces
interaction of acetylene with Si and Ge(100) surfaces; theoretical study, 101
kinetics and mechanism of gas-phase oxidation of 1-butene to butanone over new heterogenized surface vanadate Wacker catalyst, 320
nature of surface Cr species on CrO_x/ZrO_3 catalysts, 23

peculiarities of CO activation on ultradispersed Co catalysts obtained via thermal decomposition of surface carbonyl Co complexes, 146
spectroscopic evidence for surface Nb carbene in new SiO_2-attached Nb catalyst active for propene metathesis, 159
surface properties of ZnO-based catalysts and related mechanistic features of higher alcohol synthesis by FT–IR spectroscopy and TPSR, 43
surface reactions of alkanes and organometallic chemistry applied to study of pure and bimetallic catalysts, 34
Syngas
alcohol synthesis from, over Co catalysts prepared from $Co_2(CO)_8$, 361
Synthesis
alcohol, from syngas over Co catalysts prepared from $Co_2(CO)_8$, 361
of potential hybrid catalysts upon coordination of 'bare' Pd(II) with crosslinked macromolecular nitriles: catalytic dimerization of methyl acrylate, 209
surface properties of ZnO-based catalysts and related mechanistic features of higher alcohol synthesis by FT–IR spectroscopy and TPSR, 43

Telomerization
butadiene oligomerization and, catalyzed by transition metal complexes supported on organic polymers, 340
Thermal decomposition
peculiarities of CO activation on ultradispersed Co catalysts obtained via, of surface carbonyl Co complexes, 146
Titanium
mechanism of selective oxidation of C_4 linear hydrocarbons to maleic anhydride: FT–IR study of adsorption and oxidation of 1,3-butadiene on vanadia–titania, 1
Tungsten
dehydration mechanism of ethanol in pseudoliquid phase of $H_{3-x}Cs_x$-$PW_{12}O_{40}$, 293

Vanadium
kinetics and mechanism of gas-phase oxidation of 1-butene to butanone over new heterogenized surface vanadate Wacker catalyst, 320
mechanism of selective oxidation of C_4 linear hydrocarbons to maleic anhydride: FT–IR study of adsorption and oxidation of 1,3-butadiene on vanadia–titania, 1

Wacker catalyst
new heterogenized surface vanadate; kinetics and mechanism of gas-phase oxidation of 1-butene to butanone over, 320

Zinc
surface properties of ZnO-based catalysts and related mechanistic features of higher alcohol synthesis by FT–IR spectroscopy and TPSR, 43
Zirconium
catalytic behaviour of $[Cu(en_2)]^{2+}$ sorbed on zirconium molybdate in decomposition of H_2O_2, 199
nature of surface Cr species on CrO_x/ZrO_2 catalysts, 23
